PREFACE

IMPALA International is a limited liability company founded by a group of businessmen from diverse fields and specializations. Impala's management boasts over 25 years of experience in managing global car and motorcycle dealerships and local manufacturing in Egypt.

IMPALA has signed exclusive contracts with three major Chinese groups producing fully electric cars, electric motorcycles, electric tricycles, and electric minicars, as well as with manufacturers of automotive and motorcycle components.

Through these exclusive contracts, **IMPALA** has become the exclusive agent for all products of the Chinese group, not only in Egypt but also in Africa, Europe, and the Gulf region.

Consequently, IMPALA has the right to appoint agents in these countries and oversee their sales, marketing, and after-sales services. Furthermore, it has the right to manufacture in Egypt and export to these countries, positioning Egypt as the main regional hub for the Chinese giant.

CHALLINGING OF TOP MANEGEMENT

We must unswervingly take the path of independent development, adhere to our own corporate position, brand building, quality positioning, and value positioning. The direction of the enterprise must have future and hope. IMPALA must be consistent, adhere to the creation of commercial value and social value, and unswervingly implement the concept of "high-level differentiation" to make development the way out

VISION MISSION VALUES GOAL

Vision

Imposing Egypt as a regional industrial hub fore electric vehicles and appointing authorized agents in Africa, Europe and the Gulf region

Mission

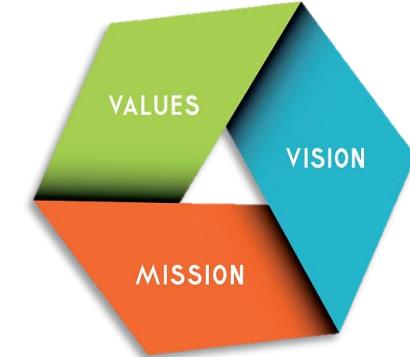

We seek to manufacture and export a high quality product and export it at competitive prices through the free trade agreements signed with Egypt to provide foreign exchange flows and provide job opportunities in Egypt.

Value

Contributing to the transition to clean energy with the highest levels of quality, safety and competitive price to satisfy our customers and gain their confident, in addition to transferring global technology to Egyptian lands.

Goal

Global expansion, global quality, global safety factors, foreign exchange flow and transfer of technical knowledge
